

Your "Get-Away"

Power in Summer is low. Summer brings mental and physical lassitude. The spirit is languid and the liver is lazy. Nature is trying to unload the toxins that come from heavy foods and lack of outdoor exercise. Help Nature to restore natural vigor and vim. Get an eight-cylinder stamina by eating **Shredded Wheat Biscuit** with fresh fruits and green vegetables. Cut out meat and potatoes; eat these delicious, nourishing little loaves of baked whole wheat and be cool, contented and happy. Eat them for breakfast with milk or cream; for luncheon with berries, sliced bananas or other fruits. Made at Niagara Falls, N. Y.

HURRICANE STRIKES EASTERN JAMAICA

(Republican A. P. Leased Wire)
KINGSTON, Jamaica, Aug. 16.—The hurricane which struck the eastern end of Jamaica last night resulted in considerable damage to banana plantations, but so far as has been ascertained coconut trees and sugar cane were not seriously affected.

Warning of High Winds
WASHINGTON, Aug. 16.—Warning of high winds tonight in the Yucatan channel, off the western end of Cuba, was issued by the weather bureau. A tropical storm was centered near western Cuba, and was expected to move westward into the Gulf of Mexico tomorrow. A slight northward movement would make it strike the Texas coast.

HEALTH HEADS OF MANY STATES STUDY PLAGUE

(Continued from Page One)

will be the prevention of the interstate spread of the disease. In his call for the conference issued August 9, Surgeon General Blue asked each state to send one representative. Four secretaries of state health boards are among those who have been designated to attend, while 24 other states have designated chief health officers, health commissioners or other officials to represent them.

In the absence of the surgeon general, who is ill at Hot Springs, Va., Acting Surgeon General A. H. Henshaw will open the conference. Secretary McAdoo will make an address and then reports on the prevalence of the disease in the various states will be heard before discussion of research problems, symptoms and methods of cure are taken up.

Epidemic Shows Decrease
NEW YORK, Aug. 16.—While September 25 was set today as the tentative date for opening the public schools of this city, postponed from September 11, because of the epidemic of infantile paralysis, Health Commissioner Emerson said it was by no means certain New York's 1,000,000 school children under 16 could resume their studies as early as that.

Definite plans cannot be made, Dr. Emerson informed Wm. G. Wilcox, president of the board of education, because it is impossible to foresee whether the disease can be checked. Another decrease in deaths in cases today reached the health authorities. There were thirty-four deaths today and 113 new cases, making the total fatalities 1,497, and the total cases 6,510. Twenty-two patients were discharged from hospitals today as recovered.

The Rockefeller Institute disclaimed a reported "corner on monkeys" for experimental purposes, the officials stating that the institute had been unable to acquire enough of the animals for its own pathological use.

More in Philadelphia
PHILADELPHIA, Aug. 16.—Despite the comparatively cool weather which has prevailed here for nearly a week, today's report of infantile paralysis broke all records during the present epidemic. 21 new cases and seven deaths being reported to the health authorities. Eight new cases of the disease were reported in the state outside of Philadelphia, several of them from new centers of infection.

Now It's Out West
SALT LAKE CITY, Aug. 16.—Frank Wylie, 25 years old, a carpenter of Idaho Falls, Idaho, who came here last Friday, developed a case of infantile paralysis today, the first in this city since one presciently began in the country. There is much speculation as to where the man contracted the disease. He had been at Idaho Falls several months and so far as known here, no case existed there.

Epidemic Unchecked Upstate
ALBANY, N. Y., Aug. 16.—The epidemic of infantile paralysis continued apparently unchecked on Long Island and up-state today, fifty additional cases and three deaths outside New York City being reported to the state department of health during the 24 hours ending at 5 p. m. Up to tonight the department had received reports of 1,133 cases and 148 deaths.

FUNSTON SAYS STRIKE WOULD NOT BOTHER HIM

(Republican A. P. Leased Wire)
SAN ANTONIO, Tex., Aug. 16.—General Funston is not worried over the threatened railroad strike affecting the food supply for the army of regulars and militiamen on the border and in Mexico. It was learned today that enough rations for every man with General Pershing's command, and in fact, in the whole department commanded by General Funston, for sixty days, is on hand. This means full rations and if a tieup of railroads of the country was to continue two months, it is said, the army would not have to stint in any particular on the food.

Should the emergency arise after sixty days and the trainmen refuse to operate the trains for military supplies, it is believed enough men can be found in the army to operate a few special trains to transport food supplies for the army.

Ref on the hoof could be had in the border country and slaughtered for use of the troops. The special army trains could be operated for vegetables, flour and other food. It is estimated that the food supplies now on hand, principally at San Antonio, El Paso, Brownsville and Columbus, represent an outlay of \$2,500,000.

PRISONERS OF GERMANS NOT BADLY TREATED

(Continued from Page One)

quarters were comfortable. In the same house there was a man suffering from rheumatism who was under treatment of German medical authorities. He was allowed forty pfennings daily. The president of the village told the correspondent that it was his opinion that the move was good, so far as the men were concerned.

An internment camp for males of military age was next visited. The men were employed as a sawmill and in cutting wood in a nearby forest, earning on an average of one mark, sixty pfennings daily and their board. Workmen on piece work were earning up to five marks daily. The correspondent visited the kitchen and found the food of good quality. The next village contained a large number of persons employed in farming and in working in a sawmill.

In most of the places visited the chief complaint of those removed was of the hardship due to separation from their families and their inability to reach relatives by mail. It was learned the Germans permit letters to be sent only through the German Red Cross at Frankfurt-on-Main, which resulted in many delays.

A German officer said that the removals were without a political motive so far as he knew, though the towns and districts from which persons were taken had given considerable trouble in the past, several had fires having occurred. From another officer the correspondent learned that the German authorities were considering a plan to return the transported persons to their towns after the crops were in, provided blockade conditions did not necessitate leaving them on the farms for the purpose of sowing the winter crops.

Official correspondence on the subject showed that the German military authorities investigated complaints made by those removed. The German officer explained in answer to complaints that the measure was necessary because the food relief from the United States was inadequate and that the Germans could not be expected to raise crops for the French.

In the towns affected by the removals, which were mostly given over to textile industries before the war, there was little work owing to lack of cotton.

CHARGE WHEAT CONSPIRACY

(Republican A. P. Leased Wire)
LONDON, Aug. 16.—The attack on the Chicago wheat pit, which the London papers have accused of conspiring to force up the price of wheat, was diverted against the English dealers today when the Times asked if there was not a corner in wheat in London, as well as in America. According to the Times, certain wheat arrivals are being taken off the market as soon as they reach it and are being held back indefinitely so as to compel makers to participate and use the most expensive grade.

MACHINISTS THREATEN STRIKE

(Republican A. P. Leased Wire)
NEW HAVEN, Conn., Aug. 16.—Machinists employed by the Winchester Repeating Arms Company here voted tonight to strike tomorrow unless the company grants an eight-hour day and other concessions. Some 2,500 men are involved. Union officials assert that if the machinists walk out, 5,500 other metal trades workers will quit.

THEIR FIRST BOY—Just as the clocks of Phoenix were striking twelve last night, a boy put in an appearance at the home of Mr. and Mrs. Ralph Gutwiler, 1517 West Jackson street. The youngster weighed the same as a ten pound sack of flour such as his father dishes out daily at Goldman's and good measure at that. There was much rejoicing at the Gutwilers home early this morning, for while they have previously been blessed with four children, all have been girls. Mother and baby are doing nicely.

DANISH WEST INDIES SALE HAS BECOME FURTHER TANGLED

(Republican A. P. Leased Wire)
COPENHAGEN, Aug. 16 (via London).—The landings, the upper house of the Danish parliament, met today as a committee of the whole to consider the treaty providing for the sale of the Danish West Indies to the United States, and 47 of the 61 members present placed themselves in favor of the order of the day stating that the sale cannot be settled before elections for both houses of parliament have been held. Five members of the landings were absent from the meeting.

The situation has been further complicated by a proposal from Premier Sabin that the government resign and help in the formation of a cabinet representing the various parties. This proposal if carried out, would avoid the holding of elections as advocated by the conservatives and the left. The premier put forward his proposal at a conference with the presidents of the political parties in the landings but it is uncertain if it can be carried out as the socialists have hitherto declined to be represented in a cabinet with members of the other party.

Nothing can be settled at present as many members of the parliament are not in town. If the idea of a non-partisan cabinet is put into effect, a plebiscite will be held on the question of the sale of the islands.

An influx of delegates of the radical government party stated in an interview that the government's offer to resign did not mean that it feared the result of an election but that it did not wish to delay the sale of the islands. He explained that if elections were held the ratification of the sale would be delayed three months or perhaps more.

CORPORAL SLAIN WHILE SAVING GIRL

(Republican A. P. Leased Wire)
RICHMOND, Va., Aug. 16.—Corporal James Clement, company Second Virginia regiment, was shot and killed tonight, and Sofia Valdez, a Mexican girl, was probably fatally wounded by another corporal assigned to the quartermaster's corps of the regular army.

A corporal who gave his name as Dunches later was charged by a posse of men and his trail lost. He later appeared at the county jail and surrendered.

Corporal Clement, who was 25 years old, came from Warrenton, Va., and is survived by his widow.

The Valdez girl had repulsed Dunches' advances, according to members of her family, and when threatened with violence it is said, called for assistance. Just as Corporal Clement appeared to aid the girl, he is charged Dunches shot the Mexican girl twice and turned his weapon on Clement, killing him instantly. A charge of assault to murder was filed against Corporal Dunches late tonight. Officers tonight discovered Dunches was slightly wounded by a bullet just below the temple. Dunches explained this, according to officers, by saying that, after killing Clement he fired three bullets at himself, one of which took effect.

MANY WAR SUPPLIES

(Republican A. P. Leased Wire)
NEW YORK, Aug. 16.—Of \$57,000,000 in exports leaving New York last week, \$25,000,000 represented war supplies, according to an announcement here tonight.

NAVAL BILL IS IN FINAL STAGE

(Republican A. P. Leased Wire)
WASHINGTON, Aug. 16.—The \$125,000,000 naval appropriation bill entered the final legislative stage today. Senate and house conferees resumed their discussions of the comparatively minor items remaining in disagreement. The bill is expected to pass both houses within a few days, possibly Friday.

Following acceptance by the house yesterday of the senate's building and personnel increases, the senate today agreed to another conference on the smaller items in dispute, and the conferees held an hour's session. No agreement on individual items was reached, but the conferees agreed to meet again tomorrow.

In the informal discussions today agreement by the conferees upon an appropriation of \$5,000,000 to equip navy yards for war craft construction was forecast. The conferees, however, still are divided on the question of which yards shall be equipped for immediate construction of capital ships.

AN OBLIGATION THERE BOUND TO BE DISCHARGED

(Continued from Page One)

veloped. I want to see it developed right."

"I think the time has come when we have got to be sure of ourselves, sure of our integrity, confident and equal to our challenge."

"I have had something to do in my life with correcting and preventing abuses in connection with public matters, and I tell you now, my friends, that whether I speak of Alaska or whether I speak of the tariff, no one is going to pull anything out at the public expense if I can prevent it."

"If I am charged with the high office of justice, I am a candidate," Mr. Hughes said in closing. "I put my principles to the test. I am not afraid of the test. I know what it means, but my friends of Oregon—you who have made me and made me become a candidate at the primary against my will—I have left the bench to undertake the active work of this campaign with but one ambition."

"It is not an ambition to hold high office. That has no illusions for me. But I have the ambition to try, so far as within me lies, to have efficient American government worthy of America's best capacity and America's name honored throughout the world."

Mr. Hughes left late tonight for San Francisco, where he is due to arrive Friday at 12:30 p. m.

INRAID COMMISSION

Because two members were absent, the city commission meeting yesterday afternoon in regular session decided to defer action on several matters until there could be a full attendance. Principal among these matters was that of awarding the contract for the liability insurance, for which bids were asked some time ago. The matter was brought to the official attention of the commission yesterday in a report from the city manager carrying a recommendation of award.

This report and recommendation is as follows:

In response to duly advertised calls for bids on liability insurance, the following bids were received on employees and liability for workmen's compensation:

Southern Surety company, \$5,441.92.
Western Indemnity Co., \$3,968.23.
Guardian C. & G. Co., \$3,354.52.

The above insurance is limited to \$5,000 in the case of each individual damaged, and \$10,000 for any one accident where more than one person is injured. Where \$5,000 and \$25,000 are substituted for the above figures respectively, the increase in premium is as follows:

Southern Surety Co., 16 per cent.
Western Indemnity Co., 15 per cent.
Guardian C. & G. Co., 25 per cent.

I recommend that the award be made to the low bidder on the basis of \$5,000 and \$10,000 policy, as there is no particular advantage in insuring the city employees in groups and very little likelihood of accident to more than one person at a time.

The bids for damage caused by automobiles under the \$5,000 and \$10,000 limit as above are as follows:

Western Indemnity Co., \$1,271.20.
Kansas C. & G. Co., \$1,027.35.
Guardian C. & G. Co., \$1,629.

For the same class of insurance under limit of \$5,000 and \$10,000:
Western Indemnity Co., \$1,549.
Kansas C. & G. Co., \$1,294.55.
Guardian C. & G. Co., \$2,025.

For property damage, \$1,000 limit:
Western Indemnity Co., \$331.88.
Kansas C. & G. Co., \$279.90.
Guardian C. & G. Co., \$544.

I recommend that the award be made to the low bidder under \$5,000 and \$10,000 limit and that the public liability insurance be taken out against teams, as the possibility of accident to the public in the case of city teams is too remote to warrant the payment of the annual premium required. If the above recommendations are followed the employees' liability workmen's compensation insurance on the employees will be awarded to the Guardian Casualty & Surety Co. for \$3,354.52, and the public liability insurance on automobiles will be awarded to the Kansas Casualty & Surety company for \$1,027.35 and insurance against property damage by automobiles to the same company for \$274.90. Accompanying is a chart showing the bids in detail.

At the conclusion of the reading of the report Acting Mayor Maclean stated that the commission had been able to consider the matter but slightly and suggested that because of the importance of the question it would be well to defer action until a full commission was present. Commissioner Jones indicated that he was not entirely in accord with the recommendation, but was willing that the matter should go over. Commissioner Dunlap said he believed that the \$5,000 and \$10,000 policies were sufficient, but stated he would like to see the matter go over. This action was accordingly taken.

ENTENTE ALLIES CAPTURE LINE OF GERMAN TRENCHES

(Continued from Page One)

bundesrath's committee was a defeat for Admiral von Tirpitz and his partisans upholding submarine warfare. The matter of Count Julius Andriassy, succeeding Baron von Burdian as Austrian foreign minister, says a wireless dispatch from Rome, now appears to be dependent on whether Emperor Francis Joseph will accept Count Andriassy's request that Hungary be allowed to have a larger part in the direction of the foreign policy of the dual monarchy. The emperor's decision on the matter, it is said, is still being delayed.

WANTS RYS. TO CONCEDE EIGHT HOUR WORKDAY

(Continued from Page One)

committee had experts at work compiling data as to the cost of the railroads of an eight-hour day. This data they planned to present to the president to uphold their position. It was anticipated that the managers would not give a decision on the president's plan until after they held a meeting following their conference with Mr. Wilson.

Members of congress kept in close touch with the situation, although it was understood no determined effort toward congressional action would be taken unless justified by the president or unless his efforts to prevent a strike should fail.

Brotherhood officials were particularly cautious about committing themselves to a plan for settlement would be agreeable to the general committee. They are anxious that any agreement which may be reached shall result from the unanimous vote of the whole committee and not appear to be forced upon them by the sub-committee.

With a view to giving the entire committee the fullest opportunity to discuss the president's proposal or any other propositions which might arise the brotherhood leaders tonight rented a hall for conference. The first meeting will be held tomorrow afternoon at 1 a. m. before calling at the White House. Leaders plan to hold another meeting after the conference with the president. General discussion of the situation will be encouraged at all these meetings, it is said, by brotherhood leaders. The problem is too big, they maintain, for the sub-committee to attempt to dictate what should be done by the full committee and they propose that responsibility for the final decision shall fall on the entire 600 men.

Most of the brother leaders who have been conferring with the president, it was declared, would be willing to negotiate all issues to the contrary except the guaranteed eight-hour day. With it assured them beyond doubt, it was said, they would be inclined to accept any fair proposition for settling collateral issues. Even the proposal of pro-rata pay for overtime, which would mean an increase of from 20 to 25 per cent of employee working extra hours, was said to appeal to them. On all hands it was reiterated that the proposal of time and a half for overtime was merely included in the employees' demands for the purpose of enforcing an eight-hour day agreement, should one be entered into.

W. S. Carter, head of the firemen's brotherhood, who went to New York last night to confer with the general committee, carried no suggestions from the employees' conferees, here as to what their attitude should be. His was a mission of execution and not argument, brotherhood leaders insisted. He discussed the general situation with the men but made no effort to advise them as to what they should or should not do.

While most of the committee accompanied Mr. Carter to Washington tonight an advance guard from the southern and southwestern parts of the country, where the eight-hour day is in effect on most of the railroads, preceded him here soon after receiving their summons from their leaders. A. R. Garretson and W. S. Stone, heads of the conductors and engineers' brotherhoods, respectively, held a conference with Samuel Gompers, president of the American Federation of Labor, during the day. What they discussed was not revealed.

"Just looking at the federation's new building," Mr. Garretson explained.

The 440 delegates from New York scattered to various hotels upon arrival here, but later most of them called at the hotel where the brotherhood leaders have established headquarters. Many were accompanied by their wives, and all carried their complete baggage, expecting to go home from here. They believed that they here would not extend over two or three days. Most of them insisted that the question at issue is not as difficult of adjustment as it had appeared at first.

More Water and Less Power Guaranteed

The Valveless Pump

WHAT IT WILL DO

It will deliver thirty inches of water for three h. p. with a 30 foot lift. Other lifts in proportion, (figure it out.)

It lifts water without a foot valve, requires no priming, will pump air and water together or air alone, will pump boiling water.

It has no valves for sand and gravel to affect.

It runs only one-tenth of the speed of a centrifugal pump and it uses one-tenth less to one-half of the power of a centrifugal.

It will deliver water from 100 to 200 feet above the pump. Will suck water 33 1-2 feet.

Engineers pronounce it the most efficient mining, milling, irrigation and hydraulic pump in America today.

See it working at 114 N. Central Ave., Phoenix. Send for catalogue.

THINKS WOMEN SHOULD HAVE VOICE IN MAKING LAWS THAT AFFECT CHILDREN

Mrs. Guldorf Dudley and her two children.

Mrs. Guldorf Dudley, leader of the Tennessee suffragists, is one of the "suffrage mothers" who will attend the emergency-called convention of the National American Woman Suffrage Association at Atlantic City, 6-10. Mrs. Dudley believes that it is high time that women had a voice in the making of the laws that affect children and the home. She will take a prominent part in deciding the next steps to be taken by the national suffragists to hasten nation-wide suffrage for women.
